

## EYEONWATER: TRACK, MONITOR, AND MANAGE YOUR WATER USAGE

### What EyeOnWater Can Do:

- **Track Water Usage** – View your daily, weekly, and monthly water consumption in easy-to-read graphs.
- **Detect Leaks** – Get alerts if continuous water flow suggests a possible leak.
- **Monitor in Real Time** – See near real-time data on your water usage.
- **Access Anywhere** – Use the mobile app or website to check your water consumption anytime.
- **Set Alerts** – Customize leak alerts and usage notifications to help manage your water efficiently.

## Q & A

### 1.) How does real-time cellular reading work? Why don't I see updates every hour?

EyeOnWater records water usage every 15 minutes and updates hourly via cellular networks. Delays may occur in areas with weak signals, but data is stored until transmission resumes.

### 2.) Will I see the exact time I used water?

No, EyeOnWater provides general usage patterns rather than exact timestamps. It helps identify continuous flow, high usage, or potential leaks.

### 3.) Can I link multiple meters to one account?

Yes! Log into the app or website, select "Add Meter", enter the meter's account number and ZIP code 84604, and verify. Repeat for additional meters.

## NORTH FORK SPECIAL SERVICE DISTRICT

# EYE ON WATER- CELLULAR READINGS

**EyeOnWater lets you track water use, detect leaks, and manage your account through the mobile app or website—anytime, anywhere**

## Mobile App Set Up

1. **Download the app:**
